

DESECULARIZE ISLAM

CapCut: AI Story Maker

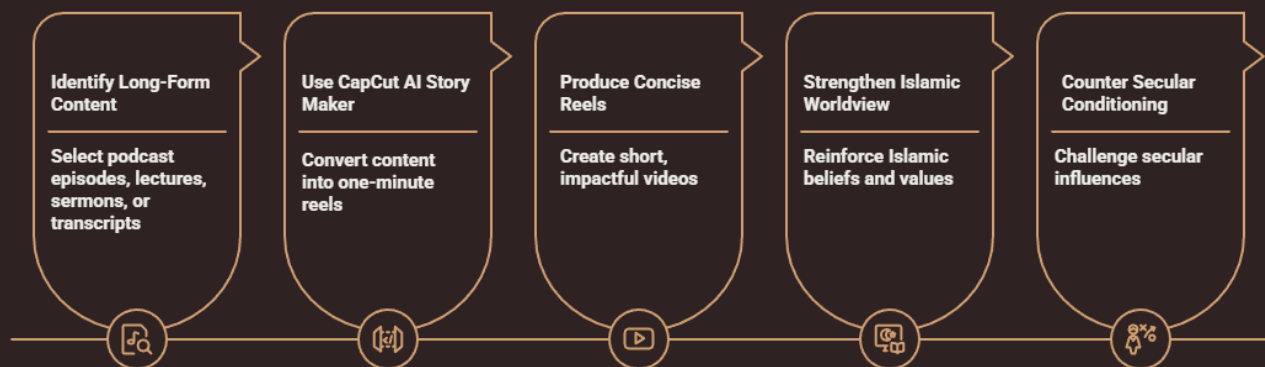

Desecularization Workflow Toolkit

A complete step-by-step system to transform raw transcripts into 1-minute, cinematic reels that dismantle secular conditioning and rebuild an Islamic worldview.

1. Overview

This document outlines a complete system for converting long-form Islamic content—podcast episodes, lectures, sermons, and transcripts—into concise, cinematic one-minute reels using CapCut’s AI Story Maker. The objective is to produce controlled, high-impact media that strengthens Islamic worldview formation and counters secular conditioning.

Islamic Content Conversion Workflow

2. Objective of the Toolkit

A. Purpose

To establish a repeatable, precision-driven workflow that transforms extended Islamic content into short desecularization reels optimized for digital platforms.

B. Strategic Mission

The workflow supports strategic objectives including:

- Reviving Islamic consciousness
- Exposing colonial ideological manipulation
- Rebuilding Islamic worldview and identity
- Counteracting secular narratives through targeted short-form media

Desecularization Workflow

3. Strategic Importance for Desecularization

A. Reversing Media-Driven Secularization

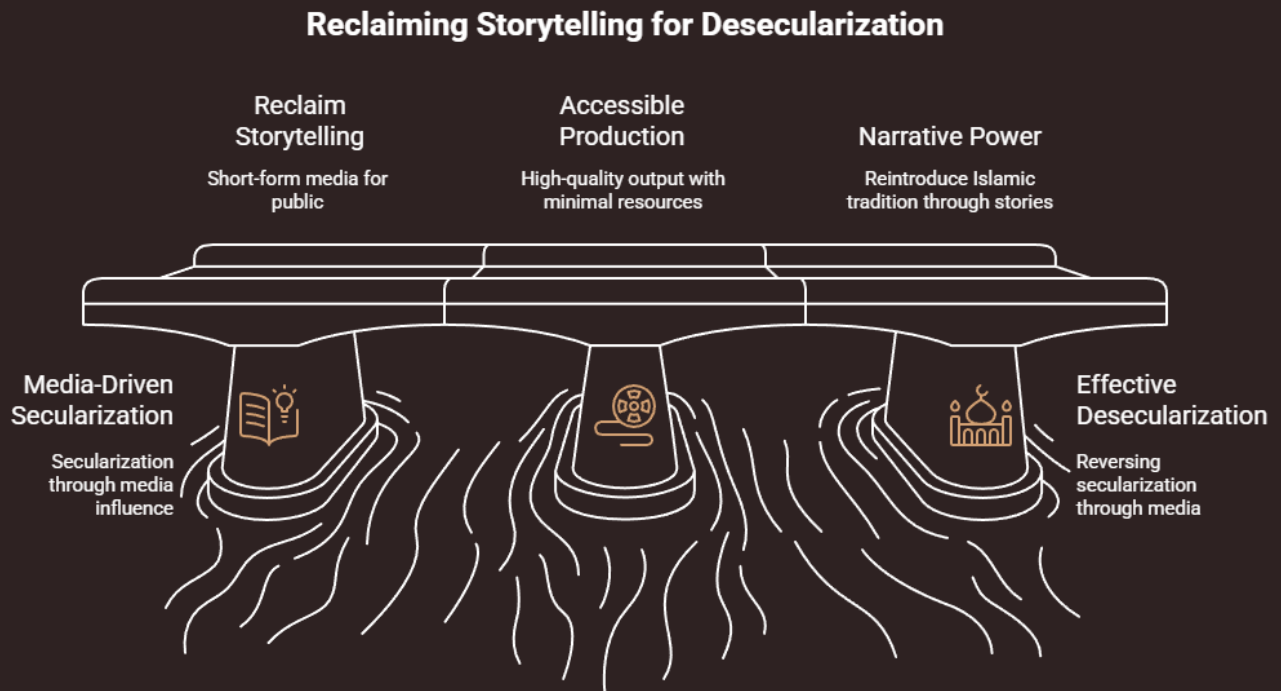

Secularization historically advanced through films, advertising, news media, and digital influencers—not through academic texts alone. Effective desecularization must therefore reclaim storytelling, especially in short-form media where public consciousness is shaped.

B. Accessible Islamic Media Production

This workflow enables high-quality output without extensive equipment or technical resources. A transcript, CapCut, and ChatGPT suffice to generate polished content.

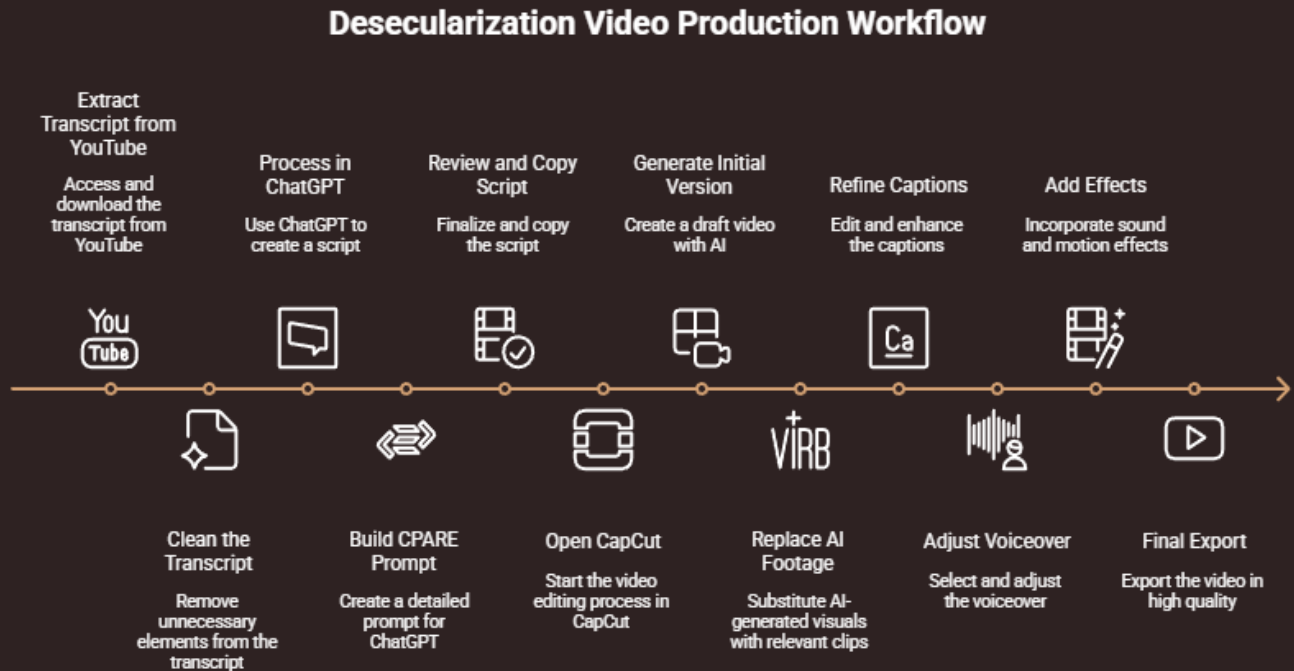

C. Narrative Power of Storytelling

Islamic tradition conveys transformation through stories of prophets, historical events, and moral struggle. Short reels reintroduce this method to contemporary audiences.

4. Twelve-Step Production Workflow

The following steps formalize the complete process from transcript extraction to final export.

Step 1 — Extract Transcript from YouTube

Access the relevant DSEC episode or lecture.

Copy the YouTube URL, use a transcript tool, and download the full text.

This provides accurate, context-rich source material.

Step 2 — Clean the Transcript

Remove filler words, timestamps, speaker tags, and extraneous artifacts.

A clean transcript improves script generation quality.

Step 3 — Process in ChatGPT Using CPARE

Paste the cleaned transcript into ChatGPT with the instruction:
“Create a one-minute desecularization reel script using the CPARE format.”

This establishes ideological alignment, emotional tone, and structural clarity.

Step 4 — Build the CPARE Prompt

Include:

- Context: One-minute desecularization reel
- Purpose: Shift viewers from secular conditioning to Islamic political consciousness
- Audience: Muslims aged 16–40 on short-form platforms
- Requirements: Fiery, cinematic tone; colonial analysis; Islamic worldview framing; punchline conclusion; strict 60-second limit
- Example line for tone: “Colonialism didn’t just take land; it rearranged our leadership structure.”

Then append the transcript.

Step 5 — Review and Copy Final Script

ChatGPT will generate a structured one-minute script containing:

- Islamic ideological framing
- Colonial exposure
- Clear messaging
- Emotional impact

Copy the finalized script into CapCut.

Step 6 — Open CapCut → AI Story Maker

Navigate to Templates → AI Story Maker.

Paste the script into the designated textbox.

CapCut will automatically produce a foundational draft.

Step 7 — Generate the Initial Version

CapCut will construct:

- Scenes
- Voiceover
- Captions
- Timeline structure

This provides a rapid preliminary edit within seconds.

Step 8 — Replace Irrelevant AI Footage

Review all auto-generated visuals. Replace inaccurate or unrelated clips with appropriate footage.

Use thematic imagery including history, geopolitics, Islamic symbolism, and colonial references.

Accurate visuals reinforce credibility and ideological clarity.

Step 9 — Refine Captions

Ensure captions are concise, properly segmented, grammatically sound, and visually consistent.

Replace terms that dilute the Islamic worldview with precise ideological alternatives.

Captions must support silent-viewing audiences.

Step 10 — Adjust the Voiceover

Select suitable narration such as Valentino or similar deep-toned voices.

Apply minor adjustments to speed and tone to match the desired impact.

A strong delivery enhances authority.

Step 11 — Add Sound and Motion Effects

Incorporate cinematic background audio, motion blur, zoom-ins, and fast cuts where appropriate.

Adjust pacing, split scenes, and refine transitions to elevate production quality.

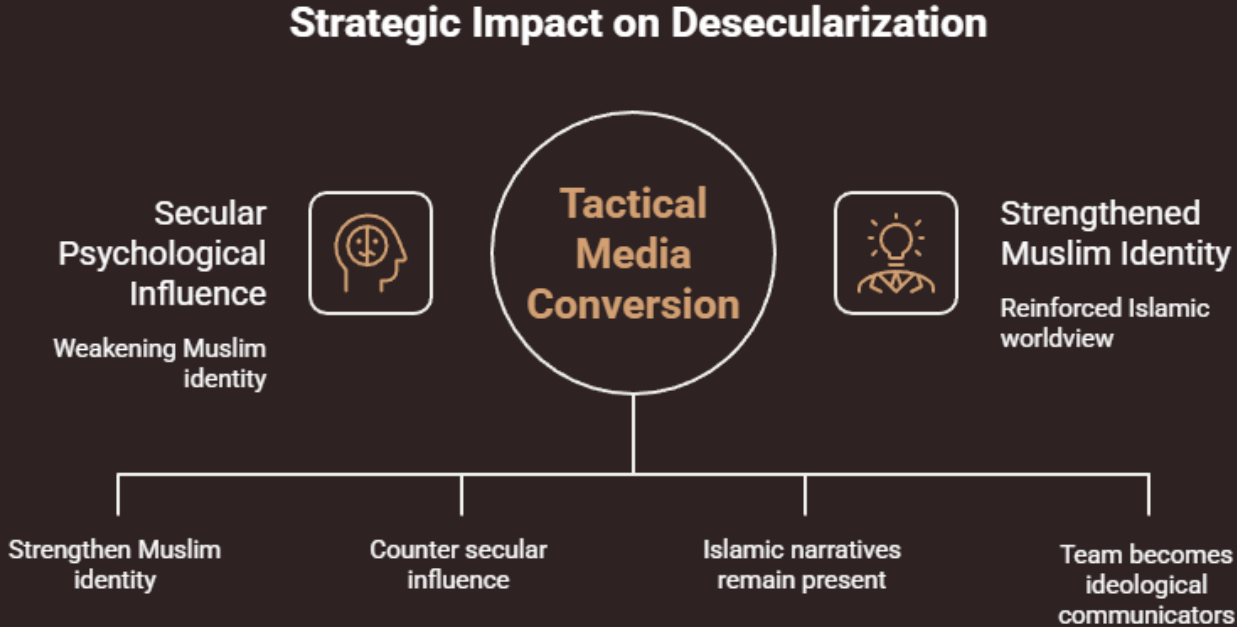

Step 12 — Final Export

Verify compliance with quality standards:

- 1080p resolution
- 60 fps
- Accurate captions
- Relevant visuals
- Balanced audio

Export the video for publication and internal archiving.

5. Strategic Impact on Desecularization

A. Conversion of Extended Knowledge into Tactical Media

This workflow enables the transformation of long-form Islamic content into one-minute ideological triggers that:

- Reinforce Islamic worldview
- Expose colonial structures
- Counter secular psychological influence
- Strengthen Muslim identity

B. Narrative Control

By producing frequent, targeted reels, the organization ensures that Islamic narratives remain present where youth spend the majority of their time.

C. Utilizing the Same Mechanisms Used for Secularization

Short-form media has been a major vector of secular influence. This workflow repurposes the same media forms to deliver Islamic ideological content grounded in Qur'anic logic and prophetic tradition.

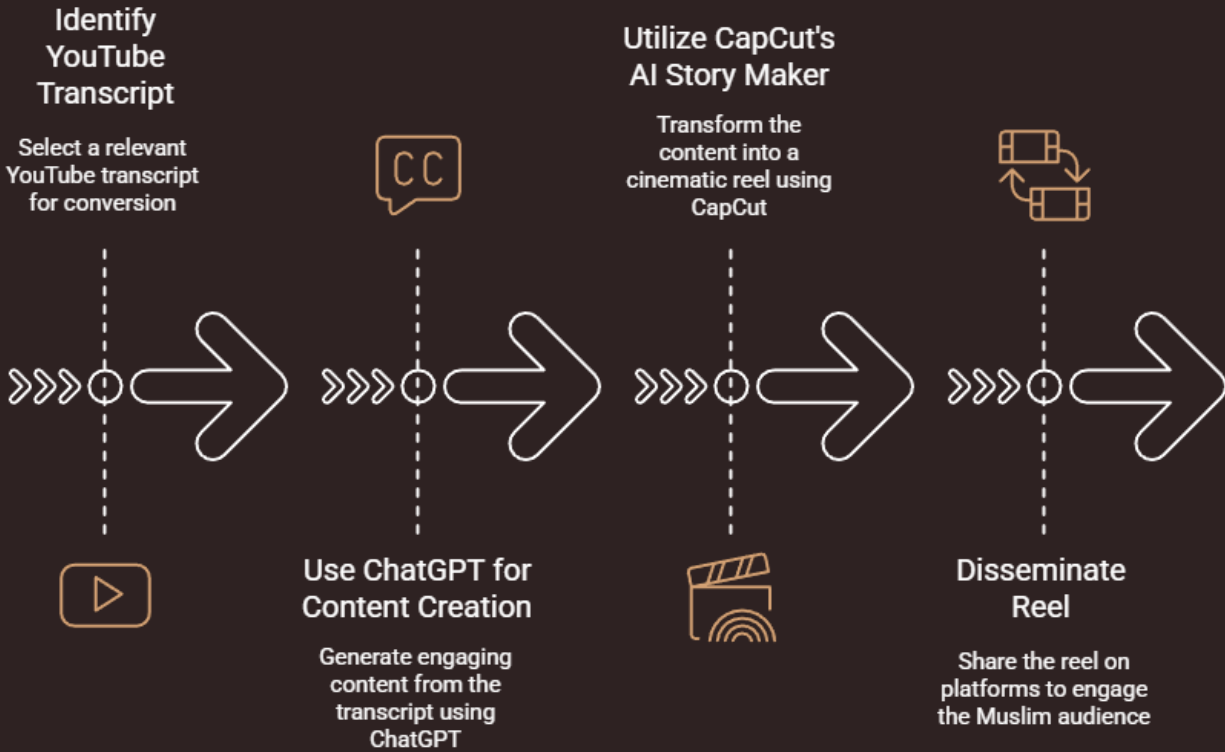

D. Expanding Media Capability Across the Team

Any team member equipped with a phone becomes capable of functioning as a scriptwriter, narrator, editor, and ideological communicator. This builds scalable media capacity.

6. Summary

This SOP outlines the full system for converting YouTube transcripts into cinematic one-minute Islamic awareness reels using ChatGPT and CapCut's AI Story Maker. It is the fastest and most structured method for disseminating desecularization content, reinforcing Islamic worldview, and engaging the Muslim audience on the platforms that shape contemporary thought.
